Extensions that will break with SUPEE-6788 / CE 1.9.2.2 / EE 1.14.2.2

List of Magento Extensions

This is a list of extensions that will break your Magento install when applying patch SUPEE-6788 or when updating to/installing Magento Community Edition 1.9.2.2 and Enterprise Edition 1.14.2.2.

This is because these extensions use the old style of creating an adminhtml router (with "`<use>admin</use>`" instead of "`<custom_moduleafter='Mage_Adminhtml'>CustomModule_Adminhtml</custom_module>`").
